MFA	Oxygen Admin	KD 35	Theory, Cert
SDI	CPR - OX	KD 20	Theory, Cert

## DIVING IN KUWAIT

The northern end of the Arabian Gulf is relatively shallow, which means the water temperature varies from 13 degrees in the Winter to 35 degrees in the Summer. These waters contain the second northernmost hard corals in the world. Despite the Harsh Environment, there have been 35 species of coral recorded in Kuwait.

Many of the fish you will also see in Australasia and the Red Sea.

Kuwait's reefs also provide nesting sites for the endangered Green and Hawksbill turtles.

Please be at Dive Caroline 1/2 Hour Prior to any trip Departure.
